

# Great audio for virtual learning is easier than you think.

Educators conducting virtual learning to learners in their homes and classes face a challenge. They are tied to their computer and its microphones and can't move around to use display devices or conduct practical work without degrading the quality of the listening experience of learners.

Easy use with any bluetooth enabled device - Adjust Mobile Connector to be comfortable to you - Close to mouth so great voice capture - Trusted Hear and Learn teacher mike quality

## Remote teaching? Mobile Connector can help.

Our Mobile Connector is an easy-to-use, flexible microphone that requires no training or complicated set-up. It pairs with your mobile device or laptop using a Bluetooth connection and is compatible with a wide variety of video conferencing and recording applications.

- **For Video Conferencing** - the Mobile Connector simply becomes your microphone, ensuring great quality no matter where you're positioned.
- **For Lesson Capture** - use the Mobile Connector with your video capture software or our free Lightspeed mobile app to easily record your videos.

Got our Redcat or other tech? Want to use this audio for virtual learning? Yes you can! Contact us to learn how!

“ Before using the Mobile Connector, my voice often was distant or muffled. Between worrying if I was positioned just right and struggling with occasional internet bandwidth issues, I was often having to record multiple takes.

**Now with the Mobile Connector, my audio is always clear and dependable, allowing me to focus my energy on creating lessons and interacting with my students.”**

*Jennifer Bishop, Second Grade Teacher  
Concord Christian School*

**Work at any distance from your blue tooth enabled device**

“ I did a four part (online) video series ... and feedback was the sound (without Mobile Connector) was echoey”

My aim as well with this training is to ... walk away (from my computer) and to know that the sound is great, and know that quality is still there.

(The Mobile Connector) opens up that door ... to actually show teachers ... they can turn around and talk to a whiteboard and don't need to be sitting in front of a computer.

You can actively engage (with students online) and have sound that's going to keep them there because ultimately it's around connection which a lot of people feel you miss and you miss that body language and that non verbal communication and with the Mobile Connector it's going to enable teachers to connect through a computer.”

*Kim Huckerby*
